# 4. Forest Revenues

This thematic area covers the entire spectrum of revenue management in the forest sector. Forests provide a major source of income in many countries. The forest revenue indicators are divided into four subthemes:

- **4.1 Forest charge administration** refers to processes to set and collect taxes, fees, royalties, and other charges related to the use and extraction of forest resources.
- **4.2 Forest revenue distribution** refers to arrangements for allocating and distributing revenues collected from the forest charge system within and beyond the government.
- **4.3 Benefit sharing** refers to specific efforts to share benefits from forest management whether these benefits are financial or non-financial in nature with local, forest-dependent communities.
- **4.4 Budgeting** refers to the annual process by which the government creates a national budget, including a budget for the forest agency.

# 4.1 Forest charge administration

## 71. Legal basis for forest charges

To what extent does the legal framework effectively regulate the administration of forest charges?

#### **Indicator Guidance:**

Governments often apply taxes, fees, or royalties (which we refer to as "forest charges") to generate revenues and regulate forest use. This indicator assesses the quality of the laws that guide government actions to design, calculate, collect, and enforce forest charges. Researchers should review laws, regulations, or other documents that establish monetary charges for forest management or use; these may include forest laws, general finance laws, or the tax code. Forest charges can apply to a broad range of activities including hunting, timber extraction, collection of nontimber forest products, timber transport, wood processing facilities, and export of forest products. Researchers should identify the major categories of forest charges in the country of assessment and select which charges are most relevant to assess (e.g. charges that generate significant revenue or charges for forest activities of interest such as timber extraction).

Ele	ement of Quality	Guidance				
1.	<b>Institutional mandates</b>	There may be one or more central government institutions with a role				
	(horizontal). The legal	in setting, collecting, managing, and overseeing forest charge				
	framework defines clear	administration. If more than one institution or department is				
	institutional roles and	involved, the law should clearly state the roles of each in				
	responsibilities for forest	administering forest charges. Relevant functions may include				
	charge administration within	collection, information management, financial management (e.g.,				
	the central government.	accounting and auditing), or monitoring. The legal framework				
		should also state any obligations among these institutions with				
		respect to information sharing, reporting obligations, and oversight				
		of activities associated with forest charge administration.				
2.	<b>Institutional mandates</b>	The law should clearly state the roles of relevant subnational actors				
	(vertical). The legal	(e.g., local government or local offices of national agencies) in setting,				
	framework defines clear	collecting, managing, and overseeing forest charge administration.				
	institutional roles and	Subnational institutions may be tasked with field operations such as				
	responsibilities for forest	calculating and collecting charges owed, verification of amounts, and				
	charge administration	identifying cases of noncompliance. The legal framework should also				
	between different levels of	state any obligations or relationships between subnational actors and				
	government.	national institutions, including information sharing, reporting				
		obligations, and oversight.				
3.	Review. The legal	Although forest charges should not be defined in the law to avoid				
	framework defines a clear	obsolete charge levels, the legal framework should establish a system				
	process for regular review of	for ensuring that forest charges are up-to-date. Examples include				
	the forest charge system.	requirements for regular review of forest charges at certain intervals,				
		or for establishing charges annually through the finance law or				
		national budget process. Note that provisions for keeping charges up-				
		to-date may also include simple measures to index charges for				
		inflation or set charges based on percentages of market prices.				
4.	<b>Procedures.</b> The legal	Rules should define procedures for collecting forest charges. These				
	framework defines uniform	may include how charges are calculated (e.g., area-based, volume-				
	and transparent	based), where charges are collected, the form in which payments				
	administrative procedures	should be made, and how charges owed and paid are reconciled to				

	for collecting forest charges.	ensure compliance. The legal framework should also promote transparency and accountability by requiring disclosure of information on revenues collected and monitoring of collection activities.
5.	<b>Penalties.</b> The legal framework defines adequate penalties to deter noncompliance with the forest charge system.	The legal framework should define clear penalties for noncompliance with the forest charge system such as fines, surcharges or interest for late payments, forfeit of deposits, suspension or cancellation of contracts, or jail time. Rules should identify the circumstances under which different types of penalties should be applied, and these penalties should correspond to the severity of infraction.

## 72. Review and revision of forest charges

To what extent are the types and levels of forest charges regularly reviewed and revised through a transparent and inclusive process?

### **Indicator Guidance:**

This indicator assesses the quality of the process by which governments determine the structure and levels of forest charges. It should be applied to a recent review/revision of the forest charge system. Processes to set or review forest charges may be set administratively or competitively. Administrative processes may be used if revision of forest charges requires revisiting legislation or formal rules. Charges may also be set competitively based on market rates by using auctions, sales by tender, or sales by negotiation to determine the price of forest contracts or products. Researchers should identify how charges are reviewed and updated in the country of assessment and collect documentation associated with the process. Relevant documentation may include studies used as inputs into the process, public comments, or meeting reports. Interviews should be carried out with key participants in the forest charge revision process.

Ele	ement of Quality	Guidance
1.	Clarity of objectives.	Objectives of the forest charge system could include enhancing
	Clear objectives articulate	economic efficiency of resource extraction, promoting sustainable
	what the forest charge	management of forests, maximizing administrative efficiency,
	system is expected to	promoting equity, or a combination of similar objectives. Objectives
	achieve.	should be articulated in the forest policy, forest law, or other materials
		shared during the charge review process.
2.	Frequency of review.	The frequency with which forest charges should be reviewed may
	Forest charges are reviewed	depend on the process by which charges are updated. Charges that are
	and revised at adequate	set administratively should likely be reviewed every couple of years,
	intervals to ensure that they	whereas charges that are indexed for inflation or based on percentages
	remain consistent with	of market prices may require less frequent updating. Researchers
	stated objectives.	should identify how often review happens, and compare the frequency
		with any relevant legal provisions to determine compliance. If forest
		charges are published regularly, researchers can compare time points
		to determine how often changes are made.
3.	Information basis.	Critical information for setting charges may include market price of
	Decisions about how to set	forest resources being extracted, inventory information about species
	forest charges are based on	diversity and composition, maximum sustained yield of high value
	high-quality information	timber species, costs of extraction, costs of administering the forest
	about the economic and	charge system, amount of revenue generated by the system, and
	social values of the forest	reports on past performance of the forest charge system in achieving
	resources being taxed and	its objectives.
	the costs of administration.	
4.	Technical expertise.	Expertise may be determined by education, trainings, experience level,
	Government staff involved	or even publications relevant to forest charges. Staff of the agency
	in setting forest charges	responsible for setting forest charges should have expertise
	have adequate technical	(demonstrated using the criteria above) in the areas of forest
	expertise in forest	economics, statistics, valuation of ecosystems, or similar technical
<u> </u>	economics.	areas.
5.	Participation. Interested	Stakeholders who are interested in the forest charge review process are
1	stakeholders are able to	likely to be those who are directly affected by the suite of forest
	provide direct inputs into	charges applied to forest management and use. For example, groups

	the process, and their	with contracts to extract forest products for commercial use (e.g.,
	inputs are addressed in a	concessionaires, community forest managers, processors and
	transparent manner	exporters of forest products). Researchers should assess whether these
		groups had opportunities to provide input into the forest charge
		review process. Review of reports from the forest charge process or
		meeting minutes may also provide useful information on who
		participated and how comments were addressed.
6.	Transparency.	Documentation of the charge review process could include reports of
	Information related to the	working sessions, records of legislative debate (if the review included
	process and final decision is	legal changes), final decisions (e.g., final laws, decrees) as well as
	easily accessible to	reports used as inputs into the process. Researchers should evaluate
	interested stakeholders.	whether information was available to those obligated to comply with
		the forest charge system.

# 73. Types and levels of forest charges

To what extent are the types and levels of forest charges appropriate to promote sustainable management and use of forest resources?

### **Indicator Guidance:**

This indicator assesses whether the current types and levels of forest charges are designed to promote sustainable management of forest resources. Researchers should apply this indicator to the major forest charges identified in Indicator 71. They should review the design of the forest charges to assess whether they support certain goals or incentives and as well as examine data on the impacts of the forest charges on natural resources. Researchers can also conduct interviews with forest sector experts, government staff who administer the forest charge system, and groups responsible for paying forest charges to examine how the levels of charges influence decision-making about natural resource management.

Ele	ement of Quality	Guidance
	Valuation. Forest charges adequately capture the value of the forest resources being extracted.	Charges that are regularly updated, differentiated by product, or based on market-prices are most likely to capture the value of the resources being extracted. For example, fees for timber extraction may be calculated based on stumpage value (e.g., based on log value and costs of extraction and transport), or set as a percentage of market or free-on-board prices.
2.	Species differentiation. Forest charges do not encourage unsustainable levels of extraction of high-value or endangered tree species.	Forest charges may be used to encourage harvest of a broader range of commercial trees to reduce pressures on high-value species. For example, stumpage-based fees may be differentiated by species or groups of species and assigned higher prices to high-value species. Area-based fees may also encourage extraction of a broader range of species.
3.	Cost effectiveness. Forest charges do not require overly expensive and complex measurement and collection procedures.	Costs of measuring and collecting forest charges should not exceed gains in revenue from levying the charge. Procedures that maximize cost effectiveness and avoid administrative complexity are often those that do not require complex measurement and fieldwork to calculate value such as area-based fees or set prices for contracts and licenses
4.	Anticorruption. Forest charges do not require measurement and collection procedures that are open to significant discretion or that are difficult to track and audit.	Forest charge collection procedures should be designed to minimize discretion and follow clear criteria. Methods may consist of field procedures that require forest agency staff to mark and measure trees that will be cut, or simple area-based taxes that are charged and paid in local forestry offices. Some countries may have declarative systems in which extractors are charged fees based on the volume of wood declared; however, such systems can introduce corruption if not subject to proper oversight.

# 74. Measures to promote compliance with forest charges

To what extent are effective measures in place to promote compliance with forest charges?

## **Indicator Guidance:**

This indicator should be applied to the agency responsible for calculating, collecting, and enforcing payment of forest charges. Often the responsibility for administering forest charges falls to a specific department within a forest agency, or may be the responsibility of local officials. Researchers should identify the relevant group(s) and gather documentation on their operations to promote compliance with forest charges. Researchers should also conduct interviews with government staff responsible for administering the system, as well as with different user groups required to comply with the forest charges to assess the effectiveness of measures to promote compliance.

Ele	ement of Quality	Guidance
1.	Transparency of forest	The responsible agency should publish a consolidated and
	charges. An up-to-date and	current list of all forest charges that is publicly available. The list
	publicly available list details all	may be available in local offices of the forest administration,
	forest charges.	online, or by request. Researchers should also attempt to
		determine whether the list is generally accessible by interviewing
		forest users and managers who must comply with the charge list.
2.	Disclosure of rules.	Laws and procedures of the forest charge system should be
	Information explaining the laws,	disclosed via website, at local forest agency offices, or any other
	regulations, and procedures of	relevant public disclosure mechanisms. Researchers should
	the forest charge system is	interview forest contract holders, resource users, and managers
	publicly disclosed.	(e.g., concessionaires, community forest managers, and other
		contract or license holders) to assess whether they have access to
		forest charge system rules.
3⋅	Disclosure of revenues.	The responsible agency should publish a record of all forest
	Information about the amount of	charges collected. The list should be made available via publicly
	revenue collected under the	accessible mechanisms. Information should be provided in a
	forest charge system is publicly	useful format that includes information on the type of charge, the
	disclosed.	amount paid, and, if relevant, the forest contract.
4.	Disclosure of	The responsible agency should maintain a list of cases of non-
	noncompliance. An up-to-date	compliance with forest charges. Such a list should at least be
	and accurate list shows all cases	maintained internally, but ideally should also be made publicly
	of noncompliance with forest	available via accessible channels.
_	charges.  Application of penalties.	Researchers should identify recent examples of noncompliance
5.	Adequate penalties are applied in	with the forest charge system. They should interview forest
	cases of noncompliance.	agency staff and other relevant parties to determine the type and
	cases of noncomphance.	magnitude of the penalties assessed. Researchers may also wish
		to review any performance reports associated with enforcement
		of the forest charge system. Adequacy of penalties could be
		compared to the penalties set out in the legal framework, or
		could be compared to similar past cases of noncompliance.
		could be compared to similar past cases of noncompliance.

## 75. Collection of forest charges

To what extent do relevant agencies have capacity to collect forest charges in a transparent and accountable manner?

### **Indicator Guidance:**

This indicator assesses the government's capacity to administer and collect forest charges. Researchers should apply this indicator to the same agency(s) assessed in Indicator 75. Researchers should gather documentation on forest charges collected, such as government reports or independent reviews. Researchers should also conduct interviews with government staff responsible for administering the system to assess their capacity and access to resources. Finally, researchers should interview user groups responsible for paying forest charges and other independent forest sector experts to get additional insight into the capacity of the government to administer the system.

Ele	ement of Quality	Guidance		
1.	Technical expertise. The	Technical expertise for revenue collection is most important in		
	agency has adequate numbers of	systems where forest officers are tasked with collecting forest		
	field staff with training in	charges in the field. Expertise may refer to experience in		
	methods to calculate and collect	conducting forest inventories, species identification, and		
	forest charges.	techniques for measuring standing volume. Field staff should		
		also have expertise on the legal framework and manual of		
		procedures for forest charge collection.		
2.	Technical resources. The	Resources for collecting forest charges will vary by collection		
	agency has access to adequate	method. They may include vehicles, GPS, marking equipment,		
	technical resources and	and DBH tapes for field measurement and collection. They may		
	equipment for calculating and	also include sufficient computers and data management software		
	collecting forest charges.	for keeping track of charges paid.		
3.	Accuracy of records. Field	The agency responsible for collecting forest charges should have		
	staff generate comprehensive and	standardized systems for recording information about forest		
	accurate records of all charges	charges. Records should document amount of charges collection,		
	collected.	as well as administrative information such as the date collected		
		and the forest officer who collected the charge. Through		
		interviews with relevant staff, researchers should also determine		
		whether documentation is maintained in hard copy or in a digital		
		format. Some countries may have computerized systems for		
		managing all aspects of forest charge selection.		
4.	-	The legal framework may set out specific supervision procedures		
	field staff is monitored to ensure	to ensure that field staff that collect forest charges are adequately		
	that charges are properly applied	supervised. Examples include data reconciliation procedures,		
	and collected.	independent monitoring, reporting procedures, or supervision		
		during field missions to collect charges.

## 4.2 Forest revenue distribution

# 76. Legal basis for forest revenue distribution

To what extent does the legal framework effectively regulate the distribution of state revenues from the collection of forest charges?

## **Indicator Guidance:**

This indicator assesses the quality of the laws that guide government administration of revenue distribution. Public revenues collected from forest operations are often sent directly to the central government coffer; in some cases, all or part of these revenues are shared with individuals or local levels of government (often in locations where production occurs). This indicator should be applied if the country of assessment has a specific law or program for distribution of government revenue from forest operations. For example, in Cameroon 10% of revenues from forest concessions are allocated to forest communities in the area of operations for community development projects. Researchers should review relevant legislation (e.g., forest laws) setting out rules and procedures for the revenue distribution program.

Ele	ement of Quality	Guidance
1.	<b>Allocation rules.</b> The legal	Rules should identify all recipients of the forest revenue
	framework clearly states how	distribution program, which forest revenues are to be shared,
	forest revenues are to be	and how revenues are to be divided among recipients.
	allocated and distributed.	
2.	Rationale. The legal framework	Rules should provide a clear basis and justification for how forest
	provides a clear justification and	revenues are distributed among recipients. For example, revenue
	rationale for the specified	may be distributed to local administrations where forest
	allocations.	resources were extracted to ensure that local actors benefit from
		use of adjacent forest resources.
3.	<b>Spending rules.</b> The legal	Rules should provide general guidance on how forest revenue
	framework provides clear	allocations are to be spent. For example, the law may mandate
	guidelines for how forest revenue	that local government allocations should be invested in
	allocations can be spent.	community development, or allocations for forest offices may be
		intended to cover costs of administration or other defined
		activities.
4.	Adequacy of allocations.	Where revenue distribution allocations are to be used for specific
	Legally prescribed allocations to	purposes, researchers should determine whether the amount of
	local government and forest	money allocated is sufficient to carry out the mandated tasks. For
	agencies are sufficient to carry	example, revenue may be allocated to cover costs of law
	out mandated roles and	enforcement activities, or for community development projects.
	responsibilities.	Researchers should identify the intent of the allocations and
		interview those responsible for carrying out the tasks associated
		with the funds to determine the extent to which the intended
		results have been achieved.
5.	Awareness of rights. The legal	If any revenues are allocated to nongovernment beneficiaries,
	framework requires that all	rules should include a requirement to notify these groups of their
	nongovernment beneficiaries be	right to benefit. Rules could require information sharing
	made aware of their right to	activities, consultation workshops, or other proactive efforts to

# 77. Implementation of forest revenue distribution arrangements

To what extent are forest revenue distribution arrangements effectively and transparently implemented?

### **Indicator Guidance:**

This indicator assesses the implementation of the revenue distribution arrangements identified in Indicator 76. It should be applied to a case of revenue distribution from forest activities at a relevant scale. Revenue may be distributed horizontally (e.g. to different actors at the same scale) or vertically across multiple scales (e.g., national, district). Researchers should collect any relevant reports, past studies, or other documentation about revenue distribution. In addition, they should conduct interviews with those responsible for distributing the revenue allocations as well as the intended recipients of the revenue distribution.

Ele	ement of Quality	Guidance			
1.	Awareness. The government	If revenues are distributed to nongovernmental recipients such			
	takes action to ensure that	as forest communities, community-based organizations, or			
	nongovernmental recipients are	indigenous peoples, researchers should interview government			
	aware of their rights to receive	agencies responsible for revenue distribution as well as target			
	distributions.	recipients of funds to determine whether recipient groups are			
		informed of their rights to revenues. Examples may include			
		trainings, information sharing through workshops, or			
		dissemination of materials such as posters or flyers detailing the			
		rights and obligations associated with the revenue allocation.			
2.	Timeliness. Revenues are	The amount of time it takes for recipients to receive their revenue			
	distributed to all recipients in a	allocations should be identified. If specific timeframes are			
	timely manner.	required by law, researchers should compare practice with law to			
		determine whether distribution is timely. Information on			
		revenue distribution may be published in annual reports or			
		records, or past studies may provide some documentation.			
		Interviews with both administrators and recipients of funds can			
		also provide this information.			
3.	<b>Monitoring</b> . Regular	An institution may be tasked with monitoring revenue			
	monitoring evaluates whether	distribution, or oversight may be part of a broader mandate of an			
	revenues have reached intended	independent monitor, audit office, or law enforcement agency. If			
	recipients.	monitoring mechanisms exist, determine whether monitoring is			
		carried out regularly. This information may be obtained through			
		review of reports, performance audits, or by interviewing			
	m m	personnel who carry out monitoring functions.			
4.	<b>Transparency</b> . The government	Governments may disclose information about revenue			
	regularly discloses information to	distribution as part of reports on agency performance, financial			
	the public about the amount of	audits, or other broader reports about forest sector economic			
	revenue that has reached	performance.			
	recipients.

## 78. Management of funds that receive forest revenue allocations

To what extent are funds that receive forest revenue allocations managed in a transparent and accountable manner?

### **Indicator Guidance:**

Dedicated forest funds that operate outside of the forest agency budget are often designed to achieve particular environmental or social objectives. This indicator assesses the management of extra-budgetary funds for forest sector activities. This indicator should be applied to a dedicated government fund used to finance forest-related activities. Funds may be designed to promote certain types of activities, to be used in specific geographic areas, or to create incentives for certain groups. Researchers should collect any laws, decrees, design documents, reports, or publications with information about fund goals, procedures, and performance. Researchers should also conduct interviews with government staff that administer the funds or other groups with knowledge of fund operations.

Ele	ement of Quality	Guidance
1.	Goals. The fund has clearly	Researchers should review legislation or fund design documents
1.	stated goals and guidelines to	and identify the goals of the fund, as well as any spending

# 4.3 Benefit sharing

# 79. Legal basis for benefit sharing

To what extent does the legal framework promote equitable sharing of benefits from forest management with local communities?

# **Indicator Guidance:**

Benefit sharing can be an important tool for ensuring that local communities benefit from natural resource extraction, protected area management, or other initiatives that affect their livelihoods. This indicator is primarily focused on benefit sharing arrangements that are codified in law, but could be adapted to assess contracts, programs, or projects that have established formal rules for benefit sharing. Researchers should review relevant forest laws, legal documents, or design documents setting out benefit sharing arrangements.

Ele	ement of Quality	Guidance
1.	<b>Legal requirements.</b> The legal	Researchers should identify whether the legal framework defines
	framework requires that benefits	specific requirements and mechanisms for sharing benefits from
	from the management of public	management of forests with local communities. These may
	forests be shared with local	include legal provisions related to co-managed schemes or
	communities.	requiring benefits to be shared as part of forest use contracts.
2.	Clarity of procedures. The	Researchers should identify whether the legal framework clearly
	legal framework defines clear	defines procedures for benefit sharing such as how decisions
	procedures and guidelines for	about benefits are made, who manages the provision of benefits
	benefit sharing with local	(e.g., administering cash benefits to households), how the
	communities.	benefits owed are calculated, and whether any accountability or
		oversight mechanisms are in place to oversee implementation of
		benefit sharing.
3.	Participation requirements.	Researchers should identify whether the legal framework
	The legal framework requires	requires that local communities be engaged in the design of local
	community participation in the	benefit sharing arrangements. Examples could include trainings,
	design of local benefit sharing	workshops, or participation of community representatives in
	arrangements.	design processes.
4.	Fairness. Legal guidelines	While the legal framework may not define all parameters related
	regarding the type and	to benefits, it should provide some guidance on the types of
	magnitude of benefits are fair	benefits that can be provided to local communities (e.g., cash or
	and appropriate.	services such as health or education). It should also define how
		the magnitude of benefits is determined. These may include
		eligibility criteria, formulas for calculating benefit levels, or
		requirements that such criteria be developed in an equitable
		manner. Researchers may want to conduct interviews with
		impacted communities to determine whether they perceive the
		legal guidelines to be fair.

79. Legal basis for benefit sharing

## 80. Design of benefit sharing arrangements

To what extent are local benefit sharing arrangements developed through an inclusive and transparent process?

### **Indicator Guidance:**

This indicator should be applied to a specific process for developing benefit sharing arrangements. Examples may include negotiating benefit sharing in a contractual agreement, revising or creating a law on sharing benefits of public forest management, or developing new arrangements to share benefits from implementation of REDD+ activities. If the process is ongoing, researchers could employ participant observation, interviews, and analysis of documents from the process to evaluate the quality of the process. If the process is finished, researchers should review documentation, final benefit sharing rules, and interview stakeholders who participated. Interviews should be comprehensive of stakeholder groups, which may include local and national governments, forest communities, private sector or other project developers, and civil society organizations.

Ele	ement of Quality	Guidance
1.	Participation. Affected communities have opportunities to participate in the design of benefit sharing arrangements.	Researchers should identify whether communities were engaged in the benefit sharing design process. Researchers should identify the specific groups or individuals engaged, the mechanisms of engagement, and whether these mechanisms provided opportunities for meaningful input. For example, 1-2 workshops that focus on sharing information is less strong than an approach that includes community representatives in a working group to draft the benefit sharing approach. Researchers may also wish to interview those involved in the design process—particularly communities—to gauge the level and effectiveness of participation.
2.	<b>Transparency.</b> Negotiations about benefit sharing are transparent, and communities have access to relevant information.	Researchers should obtain copies of information made available to affected stakeholders. They should assess whether relevant information was provided, such as the objectives and timeline for designing benefit sharing arrangements, as well as specific opportunities for public input. Researchers should also determine whether this information was provided to affected stakeholders with sufficient notice, such as whether the process was advertised through public channels, and whether communities were proactively informed.
3.	Representation. Community representatives reflect a range of community perspectives, including those of women and vulnerable groups.	Researchers should identify which community members participated in the process. They should also determine how these representatives were selected. In particular, identify whether groups such as women, youth, and the poorer members of the community participated or had representation. Communities should be interviewed to assess the representativeness of those who participated.
4· 5·	Disclosure. Final decisions about the benefit sharing arrangement are documented and shared with all community members in relevant languages.  Fairness. The type and	Researchers should assess whether the final benefit sharing arrangements are documented and how they are disclosed.  Community members should be interviewed to determine if they received information about the final decision in a relevant form, including summaries in local languages.  The extent to which benefits are fair and appropriate should be

magnitude of benefits are fair	evaluated based on the goals of the benefit sharing mechanism, as
and appropriate.	well as the type of activities that generate the benefits. Researchers
	should interview community members to determine whether they
	perceive the design of the benefit structure (e.g., the type of benefits
	that will be provided and how the level of benefits will be
	determined) to be fair.

# 81. Implementation of benefit sharing arrangements

To what extent are benefit sharing arrangements fairly and effectively implemented?

## **Indicator Guidance:**

This indicator should be applied to evaluate how the benefit sharing arrangements assessed in Indicators 79-80 are implemented in practice. Researchers should collect any documentation available on performance of the benefit sharing arrangement (e.g., monitoring reports). In addition, they should conduct interviews with those providing the benefits as well as the target recipients of benefits.

Ele	ement of Quality	Guidance
1.	Compliance. Benefits are delivered in accordance with the agreed terms set out in relevant legal or project documents.	Reports on implementation of benefit sharing may provide information on the benefits provided that can be cross-referenced with legal or project rules. In addition, intended beneficiaries of the project should be interviewed to assess whether they received benefits according to agreed terms. Interviews with administrators of the benefit sharing program may also provide information on benefit delivery. For benefits that provide services such as schools, clean water, or sanitation, researchers should verify benefit delivery in the field.
2.	<b>Adequacy.</b> Delivered benefits are adequate to achieve stated objectives of the benefit sharing arrangement.	Researchers should compare the benefits received with the stated objectives of sharing benefits with target recipients. For example, if benefits are intended to contribute to community development, researchers should evaluate the impacts of the benefits received in relation to their contribution to this goal.
3.	Awareness. Community members are aware of benefits received and obligations associated with those benefits.	Efforts to raise awareness may include trainings, information sharing through workshops, or dissemination of materials such as posters or flyers detailing rights and obligations associated with the benefit sharing program. Researchers should interview those responsible for administering the benefit sharing program to identify what efforts have been made to raise awareness. Interviews with target communities should also be done to verify that they are informed of their rights to revenues.
4.	Monitoring. The implementation and impacts of benefit sharing arrangements are regularly monitored.	Researchers should identify whether there are any formal monitoring mechanisms in place to oversee implementation of benefit sharing. Mechanisms may include oversight committees or monitoring by the forest agency. Researchers should interview those responsible for monitoring to determine how often benefit sharing arrangements are monitored and if there are reports available.
5.	<b>Redress</b> . Communities have access to redress mechanisms when the terms of benefit sharing are violated.	Researchers should identify whether communities have options for bringing grievances related to benefit sharing violations. These may include dedicated redress mechanisms associated with the benefit sharing program, administrative bodies, or even formal courts. Redress mechanisms should be easily accessible for communities to file complaints and appeals in terms of location and procedures for filing complaints. Researchers should interview communities to determine their awareness and whether they have accessed redress mechanisms.

# 4.4 Budgeting

# 82. Quality of the national budget process

To what extent is the national budget process carried out in an effective and transparent manner?

## **Indicator Guidance:**

Public sector expenditures—including those of the forest agency—are typically determined as part of the annual national budget process. This indicator should be applied as a case study of the most recent, or ongoing, annual budget process. Researchers should collect all information on the budget process that is made publicly available. Interviews should also be conducted with the legislative staff, executive staff involved in the budget process, or civil society organizations that work on financial and budgeting issues and follow the budget cycle.

Ele	ement of Quality	Guidance			
1.	Timeline. The annual	The budget calendar should clearly identify dates for disclosure of			
	budget cycle adheres to a	the pre-budget statement, the full budget proposal, the final			
	clear timeline for presenting	approved budget, mid-year or other interim reporting, and final			
	and reviewing budget	reports. A timeline may be publicly disclosed by the agency			
	documents.	responsible for the budget process or defined in the administrative			
		procedures of the budget agency. If no timeline is available,			
		researchers should review past budget processes to determine if a de			
		facto timeline was observed.			
2.	Budget proposal. The	Researchers should identify when the budget proposal was			
	budget proposal is presented	presented to the legislature, and determine whether it was also made			
	to the legislature and the	publicly available at this time. The legislature should be given the			
	public in advance of the	proposal with sufficient time for review prior to the start of the fiscal			
	budget debate.	year. The OECD's Best Practices for Budget Transparency provide a			
		guideline of 3 months prior to the start of the fiscal year for			
		presentation of the budget to the legislature.			
3.	Comprehensiveness. The	Researchers should review the budget proposal and determine			
	budget proposal is	whether it provides comprehensive information. The budget should			
	comprehensive of all relevant	include proposed revenues and expenditures, performance goals for			
	fiscal information.	the annual budget, information on government assets and liabilities,			
		and information on previous years' revenue and expenditures.			
4.	<b>Review.</b> Information on the	The budget agency should disclose a mid-year report that provides			
	final budget and midyear	information on implementation of the national budget, although			
	progress is publicly disclosed	reporting may also be done on a monthly or quarterly basis. A final			
	in a timely manner.	report on budget implementation and performance should also be			
		disclosed. According to the OECD's Best Practices for Budget			
		Transparency, mid-year reports should be disclosed within six weeks			
		of the mid-year period ending and final reports should be disclosed			
		within six months of the end of the fiscal year.			
5.	Audit. Budget performance	A Supreme Audit Institution or other relevant body should audit the			
	is audited annually and the	national budget annually. Final reports should provide information			
	results are publicly disclosed	on compliance with the revenues and expenditures outlined in the			
	in a timely manner.	budget proposal and report on any significant deviations from the			
		approved budget. According to the OECD's Best Practices for			
		Budget Transparency, final reports should be disclosed within 6			
		months of the end of the fiscal year.

## 83. Legislative oversight of the national budget process

To what extent is the national budget subject to effective legislative oversight?

## **Research Methods Guidance:**

The national legislature may provide an important balance on executive power over the national budget by providing a forum for legislators, citizens, and civil society to have input into the budget process. This indicator should be applied both to the rules governing the national budget process and to the implementation of the most recent budget process. Researchers should identify relevant legislation or rules of procedure that set out the role of the legislature in the budget process. In addition, they should collect information on how legislative debate on the budget is carried out in practice. Such information may be obtained by reviewing legislative records and reports or through conducting interviews. If the budget debate is ongoing and open to the public, researchers may also observe the debate in person.

Ele	ement of Quality	Guidance
1.	<b>Authority.</b> The legal framework grants the legislature the authority to hold public debates on the budget proposal.	Rules governing the budget process should ensure that the legislature can open up the budget process to the public through public hearings and debates.
2.	<b>Testimony.</b> The legal framework grants the legislature authority to solicit expert testimony during budget debates.	Rules governing the budget process should ensure that the legislature can open up the budget process by soliciting testimony from external experts and government staff from relevant executive agencies, including the agency responsible for the budget.
3.	Amendments. The legal framework grants the legislature the authority to propose amendments to the budget proposal.	Rules governing the budget process should give the legislature the authority to propose amendments to the budget proposal.
4.	<b>Public debates</b> . The legislature regularly exercises its rights to hold public debates on the budget proposal.	Researchers should determine whether public debates were included as part of the budget approval process. Such information may be provided through interviews with legislators or budget agency staff, or through legislative records and reports.
5.	Composition of speakers. Legislative debates on the national budget include a diverse composition of speakers representing different stakeholder groups.	Researchers should determine whether budget debates solicited testimony and input from a range of stakeholder groups. Public debates may include a range of speakers from different sectors, including civil society and the private sector. Even if legislative debate is not open, researchers should attempt to determine through review of legislative records whether speakers from different political parties, geographic areas, demographics, or caucuses participated actively in the discussion.

## 84. Creation of the forest agency budget

To what extent is the forest agency budget proposal based on comprehensive and high-quality information?

### **Indicator Guidance:**

This indicator assesses how forest information and staff with forest expertise are involved in the development and review of the forest agency budget proposal. Researchers should begin by determining who prepares the forest agency budget and by what process. The executive branch of the government is typically responsible for preparing the national budget. One office (e.g. the budget office in the Ministry of Finance) often coordinates the process by requesting information from individual departments and proposing trade-offs to manage competing government priorities within the budget's expenditure totals. The forest agency may also be involved in developing its budget or collaborating with budget agency staff. Researchers should gather information on the process by collecting any available documentation and interviewing staff involved.

Ele	ement of Quality	Guidance
1.	<b>Expertise.</b> The forest agency	Researchers should determine whether those involved in drafting
	budget proposal is developed by	the forest agency budget proposal included government staff
	staff with expertise on forest	with expertise in the forest sector. Relevant knowledge may
	economics and financial	include forest sector economics, past financial performance of
	management.	the forest sector, financial management, and costs of forest
		administration.
2.	Financial background. The	Researchers should review the draft proposal for information on
	forest agency budget proposal	the previous year's revenues and expenditures. A high quality
	provides information on the	proposal would likely also provide information on compliance
	previous year's revenues and	with the previous year's budget.
	expenditures.	
3.	<b>Projections</b> . The forest agency	Researchers should review the draft proposal for information on
	budget proposal provides	projected revenues and expenditures, performance goals, and
	comprehensive information on	activities that will be carried out.
	proposed performance goals,	
	activities, and projected costs.	
4.	<b>Review.</b> The review of the forest	Researchers should determine whether the budget agency
	agency budget proposal by the	establishes any processes for review or vetting of the forest
	national budget authority	agency budget. Examples could include ensuring that the forest
	includes stakeholders or staff	minister or other relevant authority signs off on the budget, or
	with forest expertise.	could include review by forest sector experts or agency staff.

## 85. Adequacy of the forest agency budget

To what extent is the forest agency budget adequate to fund the agency's main roles and responsibilities?

### **Indicator Guidance:**

This indicator evaluates whether the forest agency's annual budget allocation is sufficient to carry out the agency's roles and responsibilities, such as administering sector programs and enforcing the law. It should be applied to assess the budget allocation for a recently completed fiscal year. Researchers should collect information on forest agency budget allocations, which may be available in the finance law, annual budget if it is published, or through conducting interviews with forest agency staff. They should evaluate whether the amounts provided enabled the forest agency to fulfill its mandate, or whether the agency experienced budget shortfalls during the fiscal year. Interviews with forest agency staff, groups that attempted to access forest agency services (e.g., obtaining permits, technical assistance), or other sector experts may provide information on whether agency responsibilities were sufficiently implemented with the funds provided by the budget.

Ele	ement of Quality	Guidance
1.	Forest administration. The	Forest administration refers to managing and overseeing forest
	budget is sufficient to carry out	sector services and programs. These may include administration
	major forest administration	of forest use contracts and licenses, management of protected
	tasks.	areas, or carrying out specific incentives or support programs.
2.	<b>Enforcement.</b> The budget is	Forest law enforcement activities require resources for
	sufficient for forest law	conducting field operations, investigations, and in some cases
	enforcement and monitoring	prosecutions. Monitoring activities may include monitoring of
	activities.	forest cover, forest use, and the timber supply chain. They
		typically require computers, remote sensing and GIS software,
		and other technical equipment for data management and
		processing.
3.	Social programs. The budget	Social programs could include support for community forestry,
	includes funding to support	trainings in forest management practices, programs to support
	social programs and engagement	forest sector livelihoods, community development projects, or
	with forest communities.	consultations with forest sector stakeholders.
4.	<b>Institutional costs.</b> The budget	Institutional costs in the forest sector are likely to include
	is sufficient to maintain forest	infrastructure costs of national and local offices, as well as
	agency staff and institutional	general costs of supplies, equipment, and communications.
	infrastructure.	Institutional costs also refer to personnel costs, including salaries
		and trainings.

85. Adequacy of the forest agency budget						
Object of assessment:
